

PORTABLE FIRE EXTINGUISHER

AEROSOL

THE ONLY EXTINGUISHING AGENT APPROVED FOR LIQUID / GAS / ELECTRIC FIRES

Space Age Technology has provided the newest fire extinguishing development. This new Innovation in Fire Extinguishing Technology is Green Sensitive, Non Toxic, Non-Corrosive and leaves No Residue after use. The near mishap on International Space Station in 1997 initiated the development of this new fire fighting technology which is NOW available for home use in the FP Series Portable Fire Extinguisher. With its push button start, the unique Aerosol will immediately extinguish small fires at a safe distance. Clean up, if any, is easy with a damp cloth. Fixed systems are also available for Engine rooms, electrical consoles and computer rooms.

Comparing with conventional pressurized based fire extinguishers, FP Series enjoys numerous advantages such as compact size, no annual maintenance & cost, no residue after extinguishing fire, environmental friendly, easy to operate, safe and reliable.

This world smallest portable fire extinguisher series are one of the best choices to replace conventional fire extinguishers, as a latest innovative product, Helps users to protect a wide range of marine automotive and residential applications, such as Boats, Carts, kitchens and Offices.
