

Description

- | Simply unhook and swing down to access wheel

The AMC Spare Wheel Carrier is the ideal place to store your motorhome spare wheel. When needed simply unhook the fasteners at the rear of the chassis, which will allow the carrier to swing down for wheel removal. The carrier is suitable for fitment to most motorhomes on an AL-KO AMC Chassis, but please check before purchase that you have a suitable crossmember, as pictured. Without this crossmember fitment cannot be achieved. Suitable for 16inch wheels.

Suitable for use with:

- | 16 inch wheels
